

Name: KEY

Section: _____

Angle Measures

VOCABULARY

DEGREE: a unit used to measure angles ($^{\circ}$)

PROTRACTOR: a tool to measure angles

How to Measure an Angle on a Protractor:

Step 1: Determine if the angle is acute, right, obtuse, or straight.

Step 2:

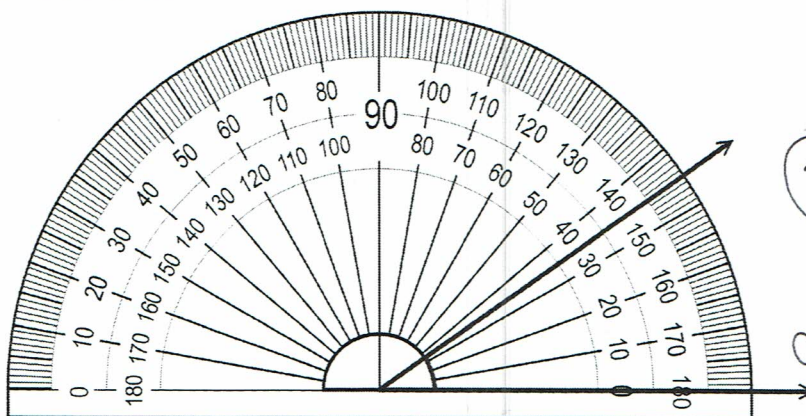

When one side is on the 0° mark:

- Look at other side and choose the measure that matches the type of angle (ex. If the angle was acute, choose the smaller measure)

When NO sides are on the 0° mark:

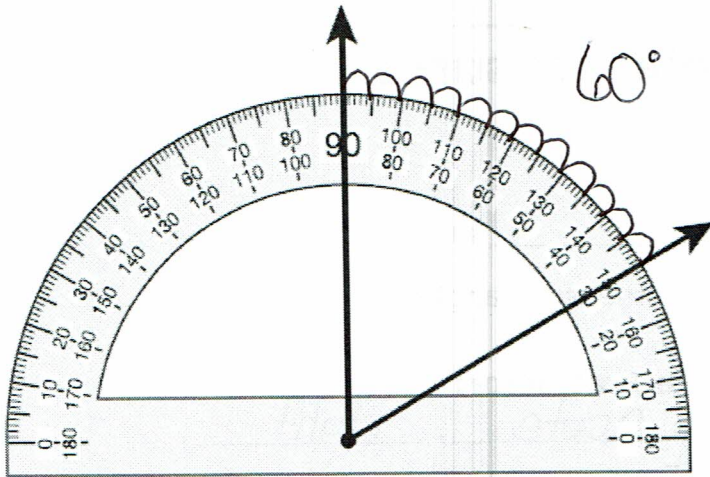

- Skip count from one side of the angle to the other to determine the angle measure.

PRACTICE

35° or ~~145°~~

acute
